Upwork, Novi Pazar
Frontend/Web Developer

EDUCATION

● **2021 - Present**   **Student of Busines IT**
State University of Novi Pazar, Novi Pazar

● **2017 - 2021**   **Mathematics**
Gymnasium, Novi Pazar

PROJECTS

2024   **EMAILYAPP**
Tehnologies: NodeJS, ReactJS, Redux, MongoDB, Stripe, SendGrid, Materialize CSS
EmailyApp is a full-stack web application designed for managing and distributing email campaigns. Built using modern technologies, the app allows users to create and send mass email surveys while tracking customer feedback in real time.

2024   **NETFLIX-CLONE**
Tehnologies: ReactJS, Bootstrap
Netflix Clone is a movie streaming web application that replicates the core features of Netflix, allowing users to browse and watch trailers of popular movies. While the platform doesn't provide full movies, it offers an immersive experience with a sleek, responsive design and a comprehensive catalog of films, complete with trailers.

2024   **TEXT EDITOR**
Tehnologies: Java, Version Control(Git)
The Text Editor is a Java-based desktop application designed to provide users with a simple and efficient way to create, edit, and save text files. It offers a clean and intuitive interface, enabling users to write, format, and manage text with ease. With built-in file handling functionality, the app allows users to open existing documents or create new ones, making it a practical tool for everyday writing and note-taking tasks.

**2023**   **RESTAURANTAPP**
Tehnologies: React Native
Restaurant App is a mobile application designed to help users discover a wide range of dishes from restaurants. The app offers an intuitive and seamless experience, allowing users to search for foods, view detailed information about each dish, and explore restaurant menus.

2022 - 2023 **IT CAMP-SERBIA 2023 WITH KNOWLEDGE OF JAVASCRIPT AND REACT.JS**
NIT Center, Novi Pazar
CERTIFICATE ID: ITCAMP2023/27.17

2024 - 2024 **NODE WITH REACT: FULLSTACK WEB DEVELOPMENT**
UDEMY, Online
CERTIFICATE ID: UC-bbaf588b-b9fc-414a-bf10-e6da8909de70

INTERESTS

Backend Engineering
Interested in building robust and scalable backend systems using Java, Node.js, and Spring Boot.

Full-Stack Development
Passionate about expanding my skill set from frontend to full-stack, with a focus on both client-side and server-side technologies.

Web APIs
Enthusiastic about designing and implementing RESTful APIs and microservices architecture.

Java & Spring Boot
Eager to dive deeper into Java development, particularly with Spring Boot for building enterprise-level applications.

Node.js & Express
Keen on mastering Node.js for backend development, focusing on building efficient server-side applications.
